

BSW Timber Limited Retirement Benefits Scheme

Statement of Investment Principles (“SIP”)

1. Purpose of this Statement

This SIP has been prepared by the Trustees of the BSW Timber Limited Retirement Benefits Scheme (the “Scheme”). This statement sets out the principles governing the Trustees’ decisions to invest the assets of the Scheme.

The Scheme’s investment strategy is derived from the Trustees’ investment objectives. The objectives have been taken into account at all stages of planning, implementation and monitoring of the investment strategy.

Details on the Scheme’s investment arrangements are set out in Appendix A.

2. Governance

The Trustees of the Scheme make all major strategic decisions including, but not limited to, the Scheme’s asset allocation and the appointment and termination of investment managers.

When making such decisions, and when appropriate, the Trustees take proper written advice. The Trustees’ investment advisers, KPMG LLP, are qualified by their ability in, and practical experience, of financial matters, and have the appropriate knowledge and experience. The investment advisers’ remuneration may be a fixed fee or based on time worked, as negotiated by the Trustees in the interests of obtaining best value for the Scheme.

3. Investment objectives

The Trustees invest the assets of the Scheme with the aim of ensuring that all members’ current and future benefits can be paid. The Scheme’s funding position will be reviewed on an ongoing basis to assess the position relative to the funding target and whether the investment arrangements remain appropriate to the Scheme’s circumstances. The Scheme’s funding target is specified in the Statement of Funding Principles.

The Scheme’s present investment objective is to achieve a return of around 2.3% per annum above the return on a liability-matching portfolio of UK Government bonds.

4. Investment strategy

The Trustees take a holistic approach to considering and managing risks when formulating the Scheme’s investment strategy.

The Scheme's investment strategy was derived following careful consideration of the factors set out in Appendix B. The considerations include the nature and duration of the Scheme's liabilities, the risks of investing in the various asset classes, the implications of the strategy (under various scenarios) for the level of employer contributions required to fund the Scheme, and also the strength of the sponsoring company's covenant. The Trustees considered the merits of a range of asset classes.

The Trustees recognise that the investment strategy is subject to risks, in particular the risk of a mismatch between the performance of the assets and the calculated value of the liabilities. This risk is monitored by regularly assessing the funding position and the characteristics of the assets and liabilities. This risk is managed by investing in assets which are expected to perform in excess of the liabilities over the long term, and also by investing in a suitably diversified portfolio of assets with the aim of minimising (as far as possible) volatility relative to the liabilities.

The assets of the Scheme consist of investments which are traded on regulated markets.

5. Investment Management Arrangements

The Trustees have appointed several investment managers to manage the assets of the Scheme as listed in Appendix A. The investment managers are regulated under the Financial Services and Markets Act 2000.

All decisions about the day-to-day management of the assets have been delegated to the investment managers via a written agreement. The delegation includes decisions about:

- Selection, retention and realisation of investments including taking into account all financially material considerations in making these decisions;
- The exercise of rights (including voting rights) attaching to the investments;
- Undertaking engagement activities with investee companies and other stakeholders, where appropriate.

The Trustees take investment managers' policies into account when selecting and monitoring managers. The Trustees also take into account the performance targets the investment managers are evaluated on. The investment managers are expected to exercise powers of investment delegated to them, with a view to following the principles contained within this statement, so far as is reasonably practicable.

As the Scheme's assets are invested in pooled vehicles, the custody of the holdings is arranged by the investment manager.

6. Investment Manager Monitoring and Engagement

The Trustees monitor and engage with the Scheme's investment managers and other stakeholders on a variety of issues. Below is a summary of the areas covered and how the Trustees seek to engage on these matters with investment managers.

Areas for engagement	Method for monitoring and engagement	Circumstances for additional monitoring and engagement
Performance, Strategy and Risk	<ul style="list-style-type: none"> The Trustees receive a bi-annual performance report which details information on the underlying investments' performance, strategy and overall risks, which are considered at the relevant Trustee meeting. The Scheme's investment managers are periodically invited, in person, to present to the Trustees on their performance, strategy and risk exposures. 	<ul style="list-style-type: none"> There are significant changes made to the investment strategy. The risk levels within the assets managed by the investment managers have increased to a level above and beyond the Trustees' expectations. Underperformance vs the performance objective over the period that this objective applies.
Environmental, Social, Corporate Governance factors and the exercising of rights	<ul style="list-style-type: none"> The Trustees' investment managers provide annual reports on how they have engaged with issuers regarding social, environmental and corporate governance issues. The Trustees receive information from their investment advisers on the investment managers' approaches to engagement. 	<ul style="list-style-type: none"> The manager has not acted in accordance with their policies and frameworks. The manager's policies are not in line with the Trustees' policies in this area.

Through the engagement described above, the Trustees will work with the investment managers to improve their alignment with the above policies. Where sufficient improvement is not observed, the Trustees will review the relevant investment manager's appointment and will consider terminating the arrangement.

7. Employer-related investments

The policy of the Trustees is not to hold any employer-related investments as defined in the Pensions Act 1995 and the Occupational Pension Schemes (Investment) Regulations 2005 except where the Scheme invests in collective investment schemes that may hold employer-related investments. In this case, the total exposure to employer-related investments will not exceed 5% of the Scheme's total asset value. The Trustees will monitor this on an ongoing basis to ensure compliance.

8. Compliance

This Statement has been prepared in compliance with the Pensions Act 1995, the Pensions Act 2004, and the Occupational Pension Schemes (Investment) Regulations 2005. Before preparing or subsequently revising this Statement, the Trustees consulted the sponsoring company and took appropriate written advice. The Statement is reviewed at least every three years, and without delay after any significant change in the investment arrangements.

Appendix A – Investment Strategy

The Scheme's current investment strategy is invested according to the following broad asset allocation:

Asset Class	Proportion (%)	Expected return (Gilts + % p.a.) ¹	Volatility (% p.a.) ²
Return Seeking	65%	+3.3	10.7
Diversified Growth	40%	+3.5	12.5
Diversified Credit	25%	+2.5	11.0
Liability Matching	35%	0.0	7.5³
Fixed-interest Gilts	35%	0.0	6.1
Liability Driven Investment			11.1
Total	100%	+2.3	7.3

¹ 10-year return (p.a.) assumption as at 30 September 2019. Expected return relative to Bank of England 10-year gilt yield (net of management fees).

² Volatility assumptions based on the standard deviation of annual returns over a 10-year period (rounded to the nearest 0.5%) as at 30 September 2019. Allows for asset correlations where more than one asset class contributing to composite total (Return Seeking, Liability Matching, Total).

³ Liability Matching composite volatility assumes a 50:50 split between fixed-interest gilts and index-linked gilts (unleveraged) as a proxy.

The expected returns shown in the above table represent long-term expectations of asset classes as a whole. Short-term returns in some asset classes may exhibit considerable variability.

The Trustees have invested in pooled funds managed by the following investment managers:

Investment Manager	Proportion (%)
Insight Investment Asset Management	20%
Newton Investment Management	20%
M&G Investments	25%
Legal & General Investment Management	30%
Total	100%

Appendix B – Risks, Financially Material Considerations and Non-Financial matters

A non-exhaustive list of risks and financially material considerations that the Trustees have considered and sought to manage is shown below.

The Trustees adopt an integrated risk management approach. The three key risks associated within this framework and how they are managed are stated below:

Risks	Definition	Policy
Investment	The risk that the Scheme's position deteriorates due to the assets underperforming.	<ul style="list-style-type: none">• Selecting an investment objective that is achievable and is consistent with the Scheme's funding basis and the sponsoring company's covenant strength.• Investing in a diversified portfolio of assets.
Funding	The extent to which there are insufficient Scheme assets available to cover ongoing and future liability cash flows.	<ul style="list-style-type: none">• Funding risk is considered as part of the investment strategy review and the actuarial valuation.• The Trustees will agree an appropriate basis in conjunction with the investment strategy to ensure an appropriate journey plan is agreed to manage funding risk over time.
Covenant	The risk that the sponsoring company becomes unable to continue providing the required financial support to the Scheme.	<ul style="list-style-type: none">• When developing the Scheme's investment and funding objectives, the Trustees take account of the strength of the covenant ensuring the level of risk the Scheme is exposed to is at an appropriate level for the covenant to support.

The Scheme is exposed to a number of underlying risks relating to the Scheme's investment strategy, these are summarised below:

Risk	Definition	Policy
Interest rates and inflation	The risk of mismatch between the value of the Scheme assets and present value of liabilities from changes in interest rates and inflation expectations.	To hedge 100% of these risks on a self-sufficiency basis, as determined by the Scheme Actuary.
Liquidity	Difficulties in raising sufficient cash when required without adversely impacting the fair market value of the investment.	To maintain a sufficient allocation to liquid assets so that there is a prudent buffer to pay members benefits as they fall due (including transfer values), and to provide collateral to the LDI manager.

Market	Experiencing losses due to factors that affect the overall performance of the financial markets.	To remain appropriately diversified and hedge away any unrewarded risks, where practicable.
Credit	Default on payments due as part of a financial security contract.	To diversify this risk by investing in a range of credit markets across different geographies and sectors. To appoint investment managers who actively manage this risk by seeking to invest only in debt securities where the yield available sufficiently compensates the Scheme for the risk of default.
Environmental, Social and Governance	Exposure to Environmental, Social and Governance (“ESG”) factors, including but not limited to climate change, which can impact the performance of the Scheme’s investments.	To appoint managers who satisfy the following criteria, unless there is a good reason why the manager does not satisfy each criteria: 1. Responsible Investment (‘RI’) Policy / Framework 2. Implemented via Investment Process 3. A track record of using engagement and any voting rights to manage ESG factors 4. ESG specific reporting 5. UN PRI Signatory The Trustees monitor the managers on an ongoing basis.
Currency	The potential for adverse currency movements to have an impact on the Scheme’s investments.	Allow the Scheme’s active managers who invest in overseas securities the flexibility to hedge overseas currency exposure to manage risk.
Non-financial	Any factor that is not expected to have a financial impact on the Scheme’s investments.	Non-financial matters are not taken into account in the selection, retention or realisation of investments.

Appendix C – Investment Management Arrangement Policies

The Trustees have the following policies in relation to the investment management arrangements for the Scheme:

How the investment managers are incentivised to align their investment strategy and decisions with the Trustees' policies.	<ul style="list-style-type: none"> As the Scheme is invested in pooled funds, there is not scope for these funds to tailor their strategy and decisions in line with the Trustees' policies. However, the Trustees invest in a portfolio of pooled funds that are aligned to the strategic objective.
How the investment managers are incentivised to make decisions based on assessments of medium to long-term financial and non-financial performance of an issuer of debt or equity and to engage with them to improve performance in the medium to long-term.	<ul style="list-style-type: none"> The Trustees review the investment managers' performance relative to medium and long-term objectives as documented in the investment management agreements. The Trustees do not incentivise the investment managers to make decisions based on non-financial performance.
How the method (and time horizon) of the evaluation of investment managers' performance and the remuneration for their services are in line with the Trustees' policies.	<ul style="list-style-type: none"> The Trustees review the performance of all of the Scheme's investments on a net of cost basis to ensure a true measurement of performance versus investment objectives. The Trustees evaluate performance over the time period stated in the investment managers' performance objective, which is typically 3 to 5 years.
The method for monitoring portfolio turnover costs incurred by investment managers and how they define and monitor targeted portfolio turnover or turnover range.	<ul style="list-style-type: none"> The Trustees do not directly monitor turnover costs. However, the investment managers are incentivised to minimise costs as they are measured on a net of cost basis.
The duration of the Scheme's arrangements with the investment managers	<ul style="list-style-type: none"> The duration of the arrangements is considered in the context of the type of fund the Scheme invests in. <ul style="list-style-type: none"> For open ended funds, the duration is flexible and the Trustees will from time-to-time consider the appropriateness of these investments and whether they should continue to be held. For closed ended funds or funds with a lock-in period the Trustees ensure the timeframe of the investment or lock-in is in line with the Trustees objectives and Scheme's liquidity requirements.
